MARKETING & ANALYTICS

Meta Ads | SEO | Google Analytics | GA4 | Google Tag Manager | Meta Pixel | Search Console | Core Web Vitals

DESIGN

Figma | Photoshop | Illustrator | Canva

WORK EXPERIENCE

Web Developer

QuantmHill IT Services & Consultancy Pvt. Ltd.
09/2024 - Present | Noida, India

- Build custom Shopify and WordPress solutions: small plugins, custom Liquid sections and bespoke templates designed from scratch rather than off-the-shelf themes.
- Adding AI features and automation to ongoing QuantmHill client projects.
- Use Claude Code, Codex, Antigravity and Cursor daily to speed up development, debugging and code review.
- Manage hosting for multiple companies on cPanel and hPanel: server migrations, backups, security and malware checks, DNS and email server setup.
- Run Meta Ads campaigns alongside the websites to support client lead generation.
- Build scalable UI with React.js, MUI and Tailwind CSS, cutting development time by 30%.
- Applied on-page SEO (meta tags, structured data, schema) for 60%+ organic traffic growth, and improved site speed by 50% via lazy loading, image optimization and code splitting.

WordPress & Shopify Developer

Digitalthriv
06/2023 - 08/2024 | Kanpur, India

- Built and customized 50+ responsive Shopify stores, improving mobile usability by 95%.
- Created websites from scratch including theme setup, payment integration and product optimization.
- Integrated Yoast, Rank Math, Elementor and other tools; achieved 100% crawlability in Google Search Console.
- Led a team of 4-6 developers end-to-end, lifting team productivity by 70% through streamlined workflows and mentorship.

CORE STRENGTHS

- Custom development beyond themes: small plugins, custom Liquid and bespoke design templates for Shopify and WordPress.
- AI-assisted engineering with Claude Code, Codex, Antigravity and Cursor, plus server-side ownership: migrations, backups, security, malware cleanup, DNS and email.
- Growth-ready builds: Meta Ads, SEO and analytics set up alongside the website.

ACHIEVEMENTS

- 2000+ Shopify and WordPress websites built for clients across industries.
- Employee of the Year award for exceptional performance.
- MCA with a perfect 10.0 CGPA (2022 - 2024).

PROJECTS

Taste of UP - Event Registration & Entry-Pass System 11/2026

Custom WordPress plugin, jagranmedia.in

- OTP-verified visitor registration.
- Auto-generated PDF entry pass with QR code, plus a VIP pass generator.
- Staff QR scanner for gate check-in; admin dashboard for registrations and check-in tracking.
- Built end-to-end as a standalone plugin (PHP, MySQL, JavaScript) rather than an off-the-shelf event plugin.

Organith.store - Organic Products E-commerce 05/2025 - 07/2025

- Built a fully responsive e-commerce store from scratch with secure payment gateways and inventory management (70% rise in user trust and repeat purchases).
- Implemented on-page SEO and schema, improving organic visibility by 85% within 30 days; PageSpeed 90+ on mobile and desktop.
- Connected Google Analytics, Facebook Pixel and Search Console for data-driven marketing (30% more targeted leads).
- Designed navigation and product filtering that improved product discoverability by 75%.

Ground Zero Defence Institute - groundzeroinstitute.com 01/2025 - 04/2025

- Designed and built a stylish, mobile-responsive website that increased time-on-site by 80%.
- Integrated WhatsApp chat and inquiry forms for a 25% uplift in customer engagement.
- Optimized with lazy loading and asset minification for under-3-second load times; set up Analytics and Search Console.

KGPL India - kgplcorp.com (Digital Marketing & Web Dev) 01/2024 - 05/2024

- Crafted a responsive homepage and service pages (Web Dev, SEO, UI/UX), boosting time-on-page by 35% and engagement by 60%.
- Schema markup, meta tags and alt attributes drove a 70% rise in organic visibility within 3 months; PageSpeed 95%+.
- Integrated contact forms, GMB and click-to-call, increasing inquiries by 40% and quote requests by 25%.

MALWARE CLEANUP & SITE RECOVERY (WORDPRESS)

- Cleaned 42 websites and found a recurring malware family across them: rogue drop-in files (db.php, advanced-cache.php, object-cache.php) in wp-content, hidden command-and-control directories, self-healing backup copies that re-infect, stub files scattered across core directories, obfuscated entries in wp_options, and rogue admin users and cron jobs.
- Cleanup: full indicator-of-compromise checklist per site; permanent deletion of malicious files (no quarantine leftovers); core re-install and checksum verification; removal of rogue admins and cron jobs; rotation of all credentials and salts; re-scan.
- Hardening and monitoring: file permissions, file editing disabled, updates, backups, and ongoing checks for reinfection.
